Scalability & Future Plan

Date	27 October 2026
Team ID	Individual
Project Name	Global Olympic Sports Performance Analysis
Prepared by	Gourav

Current System Limitations

S.No	Limitation	Impact	Priority
1	CSV values and historical coverage need validation	Incorrect interpretations if treated as official without verification	High
2	Investment is recorded as High/Medium/Low tiers	Monetary ROI cannot be calculated	High
3	Dashboard response timings and user tests are not recorded	Performance claims cannot yet be quantified	Medium

Scalability Plan

Aspect	Current State	Proposed Upgrade
User load	Tableau Public sharing	Test dashboard behaviour on target devices and screens
Data storage	Four CSV data sources	Document source provenance and maintain versioned source files
Performance	No measured timings recorded	Measure initial load and filter response times
Security	Public sharing may expose workbook data	Publish only data approved for public access

Future Roadmap

Phase	Planned Enhancement	Target Timeline	Expected Impact
Phase 2	Validate data definitions, nulls, duplicates and medal totals	After initial dashboard review	More trustworthy findings
Phase 3	Add year, season, sport and country filters where appropriate	After data validation	More focused exploration
Phase 4	Publish Tableau Public workbook and add GitHub README/link	After final QA	Easier sharing and reproducibility
